CAMPGT

ADVANTAGES

- Lightweight construction for easy mounting
- Fully incinerable
- Static air filter with long life and low initial pressure drop

Application	Suitable for demanding operating conditions like heavy polluted rural or industrial areas Pre- or final filter for gas turbines, large industrial air compressors, diesel & gas engines, generators & enclosures, wind turbines
Frame	Plastic molded;ABS
Gasket	Polyurethane, endless foamed
Media	Glass fiber
Separator	Hot-melt Separator Technology
Sealant	Polyurethane
Grille, Downstream	Support grid for filtermedia
Rec. final pressure drop	450 Pa
Max Temperature (°C)	70°C
Relative Humidity max	100%
Installation Options	In a separate bank, from the upstream or downstream sides.
Comment	Addtional product features: Lightweight construction for easy mounting Downstream synthetic scrim support Fully incinerable XL version available on request.

The CamPGT is an energy efficient solution functioning as a high efficiency filter in Camfil medium velocity multistage inlet houses. It is intended for inland industrial and rural areas. Its unique geometry provides a large inlet area and optimized air flow, thus offering a lower pressure drop than industry standard for V-shaped barrier filters.
